

Regulation 84 - Hemp

Details

Date: February 25, 2019, 1 p.m. - 3 p.m.
 Location: CDPHE, 4300 Cherry Creek Drive South, Denver, CO 80246, Bldg. B, Room B2E
 Conference call-in: 1-646-876-9923, Meeting ID: 464 392 354 (you do not need a participant ID)
 Online participation: Attend via Zoom (you must download Zoom to participate)
<https://zoom.us/j/464392354?status=success>

Purpose

The purpose of this meeting is for the Water Quality Control Division (WQCD) to gain more knowledge about the regulatory requirements needed to suit the needs of the hemp industry with regards to irrigating hemp with reclaimed water (keeping in mind that we must adhere to Senate Bill 18-038).

Desired outcomes

After this meeting, the WQCD will have a better understanding of what and how the hemp industry wants to change, incorporate into current language and/or add to Regulation 84.

By 3 p.m., we will have:

- Learned how hemp regulations and Regulation 84 can align, and if any changes are needed in Regulation 84 to meet the requirements in the hemp regulations.
- Gained knowledge of Category 3 metal concentrations for one treatment facility (an example).
- Determine whether current definitions in Regulation 84, and/or those being proposed for edible crops are sufficient for different hemp products.

Agenda

Description	Lead
1) Start up: Introductions, purpose, desired outcomes, roles (if needed) note taker, timekeeper and ground rules. Review agenda	Brandi Honeycutt, Meg Parish
2) Topic: Recap of last meeting	Brandi Honeycutt
