Hello Mary,

I would like to get clarification on a few items under the draft Non-Standard MS4 permit COR070000 so that I can better speak to how the changes might affect our district and offer possible solutions in the comment period. Could you please clarify the following:

1. TSD operates 34 locations within the city limits of Berthoud, Loveland and Fort Collins. Would our jurisdictional boundary now include all locations, many of which have populations under 1,000 students? I am still unclear on what our inspections requirements would be for these locations from the construction requirements in the draft.
2. We also have 2 charter schools that are part of our district, but do not utilize our maintenance and facility services. Would it be up to those locations to develop their own stormwater management program under the new permit?
3. What tools are available for identifying point of entry/ outfall of an illicit discharge into a local waterway? Does the state have online resources available that could be incorporated into our updated PDD and help support with the mapping requirements?

I appreciate your time answering my questions.

Thanks,
Jess Arnold
