

Colorado Department of Public Health and Environment

Department approved registered X-ray Service Companies

The following is a list of active Colorado registered Service Companies. These companies are approved to perform sales, installation or repair on the X-ray machines types indicated by the "Approved Service Specialties". Installation or service of mammography units requires a specific "Mammography" approval. Facilities with radiation machines are required to use Colorado-registered service companies to install, service or purchase radiation machines. Failure to use a registered Service Company could significantly delay the registration and certification of your machine.

Department approved registered X-ray Service Companies

The following is a list of active Colorado registered Service Companies. These companies are approved to perform sales, installation or repair on the X-ray machines types indicated by the "Approved Service Specialties". Installation or service of mammography units requires a specific "Mammography" approval. Facilities with radiation machines are required to use Colorado-registered service companies to install, service or purchase radiation machines. Failure to use a registered Service Company could significantly delay the registration and certification of your machine.

Colorado Department of Public Health and Environment

Department approved registered X-ray Service Companies

The following is a list of active Colorado registered Service Companies. These companies are approved to perform sales, installation or repair on the X-ray machines types indicated by the "Approved Service Specialties". Installation or service of mammography units requires a specific "Mammography" approval. Facilities with radiation machines are required to use Colorado-registered service companies to install, service or purchase radiation machines. Failure to use a registered Service Company could significantly delay the registration and certification of your machine.
